SALE ORDER & SUPPLEMENTAL INFORMATION ...

Sale order is catalog order! Any additional information or corrections to the printed sale catalog will be available online at www.wagyu365.com

AIR TRANSPORTATION ...

Las Vegas, Nevada Airport (LAS)

WATCH & BID ...

Watch & bid online for FREE at DV Auction

TERMS & CONDITIONS ... Cattle will sell under the standard terms and conditions.

EMBRYO GUARANTEE ... Any embryos sold as stated and are not guaranteed on conception. All embryo lots will have statements regarding each with their descriptions.

REGISTRATION, TRANSFERS & EMBRYO TRANSFERS ... Within 60 days of the date of the sale, the cattle sold will be transferred (registrations) to the new owners through the offices of the American Wagyu Association & American Akaushi Association. The fee is paid for by the seller.

PAYMENT ... All lots must be paid for immediately following the conclusion of the Wagyu and Akaushi "On the Strip" Sale, unless prior payment arrangements have been made with any representative of Wagyu365. Buyers are welcome to pay by credit card. If so, you will be charged a 3% fee on the total sum of your purchase.

DELIVERY ... Buyers are responsible for any shipping cost pertaining to embryo purchases and transportation of the live cattle. Wagyu365 buyers and sellers will work together to make this the easiest and most efficient process possible. Export details are listed on each lot.

LIVESTOCK MORTALITY INSURANCE ... Any representative of the Wagyu365 team can assist any buyer with insurance regarding their purchases.

LIABILITY ... All persons attending the sale, do so at their own risk, legal or otherwise for their safety. The consignors, sale management, and sales staff assume no responsibility or liability for property loss or any accidents that may occur.

\$5,000 GIVEAWAY

All in-person sale attendees will be eligible to win a sale credit up to \$1,000!

PAYMENTS

All lots must be paid for immediately following the conclusion of Wagyu & Akaushi on the Vegas Strip Sale IV. You will receive an invoice by email following the sale. Please read and follow the payment instructions that accompany your invoice copy. Both IN PERSON and ONLINE buyers are welcome to pay by cash, check, credit card (you will be charged a 3% fee on the total sum of your purchase), or wire.

Auction money and proceeds will be conducted under Randall O. Ratliff, DBA R & R Marketing, P.O. Box 60097, Nashville, TN 37206.

Bond # 7901027402 (U.S. Department of Agriculture, Grain Inspection, Packers and Stockyards Administration Packers & Stockyards Program). Contact Abby@wagyu365.com for any questions in regards to payment.

For any animals advertised through the American Wagyu Association that are registered with the American Wagyu Association, must include their registration number in sale catalogs, flyers, eblasts, etc. For those animals not registered with the American Wagyu Association please make a statement regarding their eligibility to be registered with the American Wagyu Association and assurance of seller to register them with the American Wagyu Association if the buyer should request such registration.

LiveAuctions.TV

LIVEAUCTION.TV

If you have any questions in signing up for the sale, please contact representative Erick Schmidt, 830.263.0166 or email Erick@liveauctions.tv.

1. CREATE AN ACCOUNT ...

- Click "Register to Bid" on the top right corner of LiveAuctions.tv.
- Agree to the terms of service and finish with the "register" button.
- Fill out the required information to bid online.

2. REGISTER FOR A BUYER NUMBER ...

- From the home page or the "all auctions" page, choose the sale you're interested in.
- Once selected, click the "request a buyer number" button.
- Verify your email address with the email verification link. To verify your mobile number, click "send token." Follow the steps to authorize your mobile device and click "submit."

3. BID SUCCESSFULLY ...

- You will only have to complete the two-step verification process one time. After that, you will be able to immediately request a buyer number on any auction without verification. If you're a winning bidder, your lots will appear in your cart on the bottom of your screen. You will be contacted by the ranch or sale manager for your payment and shipping plans.

- Artesian Ranch proudly offers you a choice of three full sisters to Artesian Merida L320, the highest-selling lot at the inaugural "Stars of Akaushi in Cowtown Sale" last June. Their dam, 7209Z, has become the lead donor of our breeding program here at Artesian Ranch and her progeny has played a key role in the maternal base of our herd. Her pedigree features the renowned Big Al x Shig/Haruko breeding, known for producing some of the highest marbling in the breed, and is linked to the prolific Heartbrand T0504E ("Elephant Cow"). MCC 7209Z has produced progeny with excellent phenotype, docility, and maternal traits making her an asset to both the seedstock and commercial programs.
- These heifers are sired by GK4 Rueshamaru, a top son of Kaedemaru 2, who is a cornerstone maternal line in the Legendary Akaushi herd. He is sired by the popular Rueshaw, whose semen has sold for \$20,000 a straw. Rueshamaru is known for producing thick, stylish calves while maintaining the critical carcass traits that define the Akaushi breed. The combination of 7209Z and Rueshamaru genetics offers an exceptional opportunity to enhance your program with proven marbling, excellent phenotype, and top maternal traits.
- Full sibling, Artesian Merida L320, Top Selling lot '24 Akaushi Association Sale at \$38,000

- The sire of these heifers is the great SOR Mr Hiromitsu 1090D. He was the Grand Champion of the Houston Livestock Show in 2017 & 2018, Grand Champion of the National Western in 2018, and he won the prestigious PJ Budler Sponsored World Championship in 2018. From a conformation basis, he is superior in form to his sire, WSI Umemaru, who is known as one of the best marbling Akaushi sires ever produced in North America. Mr. Hiromitsu's dam is Kaedemaru #2, a Tamamaru daughter of Kaedemaru. Kaedemaru #2 is a transcendent cow and another hall of famer. The dam side of this mating combines Rueshaw and Big Al, Two of the powerhouse sires in the breed along with a dam lineup that is second to none, Kaedemaru, Dai Hachi 8 Marunami, Akiko, and Fuyuko. These heifers are show stoppers and will add tremendous value to any herd.

- 70 days safe bred as of 10.4.24 to MHR ALAMO BOBS BELLE STAR 311L (AF321633)
- This female has been an easy keeper that is docile and should make a top female for any herd. Since she is a Hastings 1066 daughter you can expect calves exceptional in ALL categories. We hate to sell her but we can't keep them all!
- SOR Hastings 1066 ET (FB23378/ EAF97355) is a top Big Al x Kaedemaru son. He is genetically exceptional in marbling. Hastings resembles Big Al's functional and fleshy body type. His feet and leg structure are excellent and the majority have a great disposition.
- BEEMAN RANCH 1351D (AF88585) is a TWINWOOD TW0660Z daughter which is out of the well known SHIGEMARU bull. Twinwood's Herd sires are a direct result of some of the best sires and dams of the breed.
- BELLE STAR GOES BACK TO THE HIKARI BULL & ALAMO. Alamo is a calving ease Specialist with added Maternal Value to produce great daughters. The calf will be a combined genetics of some of the most well know names in the industry.

- The sire of these pregnancies is Tamamaru, one of the most widely used and predictable Akaushi bulls due to his consistency and legendary mother, Dai-Hachi 8 Marunami. There's no other foundation sire that can add the length of body and stoutness of structure. His sire, Dai-Go 5 Tamanami Tokkyu 96 provides a slight outcross to the rest of the 1994 importation. Tamamaru is a paternal sib to the foundation cow Dai 9 Kobai 73. Tamamaru is F11 free.
- Ms Big Al E244 is a rare Big Al over Judo cow and is a calf raising machine. She has tremendous maternal instincts and we've never seen a milk producer in this breed like her. She consistently produces calves with exceptional growth along with docility and eye catching frames. Add in the best cow producing sire in the business in Tamamaru and this mating has the potential to produce a foundation animal second to none!

• The donor dam of these embryos, Natsuki, is a rare daughter of Kotsukari. Natsuki features the legendary Akiko on both sides of her pedigree with Kotsukari, who is a Hikari son of Akiko, as her sire and then Akiko positioned as the foundation of her maternal side. The maternal line features an unrivaled stack of import and original sires in Judo x Shigemaru x Big Al x Tamamaru x Akiko. Resulting calves from these embryos will have great appeal from a performance and pedigree perspective and will create tons of interest for the owner.

- Recip from Trans Ova in Chilicothe, Missouri: Angus-based beef cow that two to six years of age; screened for BVD, Brucellosis, BLV (Leukosis), Neospora, Johne's, and Anaplasmosis.
- Ashwood F X014 semen is extremely limited and is prized in Australia at Robins Island Wagyu for adding weight and milk, while maintaining marbling. He is renowned as a Red Wagyu that performs like a Black Wagyu. Evidence has shown F X014 progeny are averaging a Masterbeef score of 11.2 in the Robins Island program. Our goal as a producer is to produce bulls that maintain calving ease and sufficient growth while injecting high levels of marbling at an earlier age than typical across the breed. FX0014 is the most consistent in terms of exceptional marbling and more than likely this is due to the influence of his granddam, Namiko. Legendary 2102F is dual registered with the AWA(FB102099) and AAA(AF218823), free of all genetic defects, docile, has great conformation, boasts fertility, and has an SCD/tenderness score of AA3. A Samsung daughter with a bottom side highlighting a Big AI daughter of the original import cow Fuyuko. Adding these complimentary marbling traits and structure to this mating should pay dividends many times over moving forward. ****Dual registered****

ESTIMATED CALVING DATE 11.29.2024 RECIP BLACK ANGUS, TAG #612, DOB 09.15.2024

- HEARTBRAND SAMSUNG S0947P is a F11 free Shigemaru son that endured one of the longest tenures as a herd bull in the HeartBrand herd. His impressive feet and leg design, fertility, and quality of offspring kept him breeding cows twice a year for over 10 years. Samsung is one of the most proven and consistent sires that has one of the highest progeny retention rates among all bulls in the history of the HeartBrand herd. His dam, Haruko, is a foundation female that was imported from Japan in the mid 90's.

- CHR MS Akai Hoshi 692D (FB23554) is a VERY PROUD dam of one of the Denver Stock Show Champions from the 2024 competition.
- Her sire is Bald Ridge Henshin and he is an outstanding sire. He is very correct, has a great temperament and exceptional growth. He is a grandson of the great Kajikari with Heart Brand Big Al on both sides of his pedigree, very desirable in the breed.

- The Angus recipient cow tag 612 is in her prime. She is due to calve 11/29/24 with a possible show stopper from Samsung S0947P and the 692D cow). A pregnancy from this mating is a unique combination.

- A pregnancy from this mating is a rare combination of sires with Tamamaru which is timeless and highly sought after plus the Bald Ridge Henshin sire. Henshin semen was imported from Australia, so he has not seen heavy use in the US, but his offspring are excellent, making this Tamamaru x Henshin combination a special genetic package. Tamamaru is one of the most widely used and predictable Akaushi bulls due to his consistency and legendary mother, Dai-Hachi 8 Marunami. There's very few foundation sires that can add the length of body and stoutness of structure like him. His sire, Dai-Go 5 Tamanami Tokkyu 96 provides a slight outcross to the rest of the 1994 importation. Tamamaru is a paternal sib to the foundation cow Dai 9 Kobai 73. Tamamaru is F11 free.
- The maternal line of the dam is the Homare line which was also imported. The Homares are a great transmitting line that have stood the test of time over several decades of Akaushi breeding in the US. This bull calf will be a stud candidate that should be well mannered, highly fertile, easy calving, and strong marbling. This bull will be a great foundation bull to build a herd on.
- Tag 03 is a model recipient with good maternal instincts and a docile temperament which is normally passed on to the calf.
- This Angus cow is in her prime and doing a great job raising this FB calf. She is ready for another embryo if you want her for that reason or put her with your FB bull for a F1.
- Sells with recipient mother.

- CLV Miss Michimaru "Michi" or "M&M" has 2 markers of the rare dilution/luminent gene and so she is white. The improved Blonde (grey) and White Wagyu are lighter colored and so reflect the sun's rays and are more heat resistant, while retaining the fine meat quality that Wagyu have. On the Australian herdbook all dilution(luminent) gene Wagyu are considered Red(grey) or RG. which shows the origin of this luminent gene from the Red Akaushi line Wagyu. Probably down from Homare. The Akaushi line was made up originally from some Simmentals and they also have the same luminent gene and so we surmise it came thru that way. SOR Unzen was a red colored 100% Akaushi line bull yet he is heterozygous for the luminent gene and it is ""hidden"" as he is a typical red. A few Red Akaushi line Wagyu breeders will occasionally have a heterozygous luminent ash blonde calf and in some cases a homozygous luminent white calf is born. I had a white bull calf born in 2018 from a Red Akaushi line sire and an ash blonde cow.
- Michi was in heat on 8/8/24 and with two white fullblood yearling bulls, CLV Shiroi Seigi CLVF23U24 and with CLV Shiroi Cajetan CLVF23U23. I also AI'd her with SOR Unzen semen so I would put the first sire as Seigi and second as Unzen and 3rd as Caj. She is confirmed pregnant by a Biopryn blood sample test. If the sire is either of the yearlings it will be white. If SOR Unzen is the sire usually a 50% chance for white and a 50% chance for blonde or red.
- Michi is free of B3, CHS, CL16, F11, and F13 by parentage.
- Michi's sire is Tam, the Patriarchal sire of the White Wagyu's with fast growth and docility, and her dam's sire is Brian Schardt's fine red Wagyu bull, SCC Shigemaru Red Star. So Michi is 3/4 Red Akaushi line Wagyu genetics and 1/4 Black Tajima line genetics.
- Michi has been blood tested in October and is free of Johne's disease, Bovine Viral Diarrhea BVD, and Bovine Leukosis Virus BLV.

- This bull brings together the renowned genetics of JMK Cattle, a leading producer of Akaushi cattle in Texas for many years. He is a deep bodied bull who should be expected to excel as a calving ease specialist, thanks to his low birth weight and balanced skeletal design. His dam offers a unique twist on the Kaedemaru line, combining the marbling power of Red Emperor, a proven marbler in Australia, with the body depth brought by her dam, an Ashwood 007x daughter. This rare breeding adds valuable traits to the Kaedemaru line, blending body capacity with excellent marbling potential.
- The bull's sire is a herd sire at JMK Cattle, sired by Come & Take It and out of JC MS RUESHAW 122. We admire the sire's structure, and his dam should be considered one of the top daughters from the Homare maternal line.
- Registered in AAA. Will register in AuWA if requested. Could be registered in AmWA but that is the responsibility of the buyer.

DAM

Ashwood F X014 semen is extremely limited and is prized in Australia at Robins Island Wagyu for adding weight and milk, while maintaining marbling. He is renowned as a Red Wagyu that performs like a Black Wagyu. Evidence has shown F X014 progeny are averaging a Masterbeef score of 11.2 in the Robins Island program. Our goal as a producer is to produce bulls that maintain calving ease and sufficient growth while injecting high levels of marbling at an earlier age than typical across the breed. FX0014 is the most consistent in terms of exceptional marbling and more than likely this is due to the influence of his granddam, Namiko. LAG 2194F is dual registered with the AWA(FB102100) and AAA(AF154239). Here we have a double bred Dai 8 Marunami stacking the deck for marbling. Marunami was selected to lead Akaushi breed improvement in Kumamoto Japan before her eventual export to the United States. The dam of this donor is a full sister to Heartbrand Red Emperor, a sire known for his elite marbling. Her sire Heartbrand H0518E is equally as impressive being a Hikari X Marunami son. She is free of all genetic defects. **Dual registered**

- Ashwood F X014 semen is extremely limited and is prized in Australia at Robins Island Wagyu for adding weight and milk, while maintaining marbling. He is renowned as a Red Wagyu that performs like a Black Wagyu. Evidence has shown F X014 progeny are averaging a Masterbeef score of 11.2 in the Robins Island program. Our goal as a producer is to produce bulls that maintain calving ease and sufficient growth while injecting high levels of marbling at an earlier age than typical across the breed. FX0014 is the most consistent in terms of exceptional marbling and more than likely this is due to the influence of his granddam, Namiko. SW 44-J78Z is a daughter of Red Emperor out of IWG Rueshaw 78Z. We think she is pretty special and set up to take marbling to the next level. 78Z is in the top 1% of IWG donors for growth, milk, marbling, and docility. We saw these traits pass through her daughter as a first calf heifer raising the heaviest fullblood steer of the Spring, which moved her into our donor lineup.
- Next level, with a SCD/tenderness score of AA5!

Rueshaw was one of the first two Wagyu bulls ever to leave Japan. He was the Japanese Red National Champion Bull in 1975. Originating from the Kumamoto Region, which is the heart of the Japanese Akaushi breeding capital, Rueshaw was a bull imported before his time in 1976. He possesses a valuable outcross in his genetic makeup that is vital to Akaushi breeders. Rueshaw semen, when available for purchase, has exceeded \$20,000 per straw. Take this mating and go any direction that you want with it. Legendary 2102F is dual registered with the AWA(FB102099) and AAA(AF218823), free of all genetic defects, docile, has great conformation, boasts fertility, and has an SCD/tenderness score of AA3. A Samsung daughter with a bottom side high-

• A great opportunity to secure Rueshaw genetics for your herd! Rueshaw is renowned for his outcross bloodlines, not being related to the rest of the 1990s imports but he does not sacrifice performance either. This is what makes him such a valuable breeding tool! The dam here is a Heartbrand Charlie daughter bringing his H0518E x Shigemaru x Ume balanced genetics to support Rueshaw. She traces back to a Shigemaru x Akiko cow who is a full sister to Heartbrand Red Star. These embryos blend perfectly the Akiko maternal line with Rueshaw. Rueshaw semen is ultra rare and expensive, selling for over \$20,000/straw. Get embryos here while you have the opportunity!

- In 1976, Rueshaw 430 was one of the very first wagyu bulls to ever leave Japan. A full blood Akaushi bull, Rueshaw was the Japanese Red National Champion Bull in 1975. He originated from the Kumamoto Region which is the heart of the Japanese Akaushi breeding capital. Rueshaw 430 was a bull imported before his time. He possessed a valuable outcross of blood in his genetic makeup that is vital to the Akaushi stud breeders.

- This matron puts together a pedigree that offers many breeding opportunities! She is special in that she is a product of the Kuniaso maternal line (which produced JC Rueshaw 92!) and her maternal line has no Shigamaru, ikari, or Big Al. Think of the mating possibilities with this cow! She is sired by the highly proven bull, Kalanga Red Star, and her closest maternal sires are Tamamaru and Judo. This is a fantastic genetic opportunity!

He possessed a valuable outcross of blood in his genetic makeup that is vital to the Akaushi stud breeders.

• Here is a daughter of JC Rueshaw 75! This cow brings to the table everything you are looking for. Her sire is the sought-after, high-value Rueshaw 75. Her maternal line is the highly profitable Akikos. Her branch was developed in Australia in the highly regarded Kalanga herd which had an outstanding Akaushi program down under. The maternal grandsire of this lot is Kalanga Red Star 402. He brings in the blood of the super brood cow Homare. Red Emperor, Hikari, and Shigemaru take the bottom side of the pedigree directly back to Akiko.

- Big Al was the first bull born outside of Japan in January of 1995. Big Al is the legendary Dai 10 Mitsumaru 76 son of Akiko and is highly proven with elite EPDs. To this day Big Al has top 30% growth and maternal EPDs along with top 10% carcass EPD for Ribeye Area, Marbling, and Carcass Index! On top of his fantastic EPDs, he is known for making incredible females with growth, strength, maternal traits, and longevity. Big Al is considered by many to be the greatest Akaushi bull of all-time!

- D18 is a daughter of JC Rueshaw 75 and is a direct maternal line descendent of the super elite foundation cow Namiko! Between Rueshaw 75 and Namiko are two supersires from Australia — Kalanga Red Star and TWA Kajikari. This is a great investment opportunity to capture leading Akaushi genetics with a major Australian genetic influence.

• The Wright Wagyu Master Chef offers an elite combination of carcass traits from his sire TWA Kijikari (Hikari x Ume), and top 1% of the breed for growth and maternal traits from the Shigemaru and Homare lines.. He is a leading Australian Akaushi sire with very limited semen available. The dam of this lot is a daughter of GK Rueshamaru. He brings Rueshaw and Keademaru's carcass traits to this donor dam. Behind this is an impressive stack of Ashwood Park Virile x Judo x Shigemaru x Big Al x Tamamaru x Akiko! This donor dam features outcross sires Rueshaw and Judo, but is sure to im- print elite carcass ability from the Akiko maternal line. Sire and dam are Dual Registered with AAA.

• Embryos purchased by USA buyers will be sent to Semex USA in Madison, WI.

• Hikari might be our favorite foundation sire. He has given the Akashi breed some of the greatest carcass producing progeny to date. We will continue to rally around this bull and his elite sons such as WSI Umamaru, TWA Kajikari, Kotsukari, and Hearbrand H0518, along with his grandson Master Chef and his great-grandson Bald Ridge Henshin. Hikari's fantastic legacy and impact on the Akashi breed is special. The Akiko maternal line houses the premier carcass traits in the breed.

Akiko herself is the dam of proven sires Big Al, Heart Brand Red Star, TWA Kotsukari, and Come and Take It! Sire and dam are Dual Registered with AAA.

• Embryos purchased by USA buyers will be sent to Semex USA in Madison, WI.

• Ashwood Park Virile is an Australian sire who has very little presence in North America. This is an excellent opportunity to acquire his semen and incorporate into your own breeding program. Virile is a sire with a proven track record, but even better is his highly desirable pedigree of Shigemaru x Hikari x Namiko. The Namiko maternal line has created some exceptional cattle and here is your chance to capitalize on those genetics. The donor dam of these embryos, Natsuki, is a rare daughter of Kotsukari. Natsuki features the legendary Akiko on both sides of her pedigree with Kotsukari, who is a Hikari son of Akiko, as her sire and then Akiko positioned as the foundation of her maternal side. The maternal line features an unrivaled stack of import and original sires in Judo x Shigemaru

x Big Al x Tama- maru x Akiko. Resulting calves from these embryos will have great appeal from a performance and pedigree perspective and will create tons of interest for the owner. Sire and dam are Dual Registered with AAA.

• Seller guarantees one pregnancy with the purchase of these embryos.

- The dam of this lot is SOR 1088C, a full sister to the World Champion Hiromitsu bull, sharing much of his exceptional phenotype. She is a large, deep-bodied, and well-muscled cow. Being a line-bred Kaedemaru cow, 1088C offers a unique opportunity for outcrossing with many bulls in the breed, which is exemplified in this mating to Mr. Rueshaw.
- Mr. Rueshaw is a rare son of the Ringo line. His dam, Brooke, has been a flagship cow of the Legendary program, known for her high maternal qualities and ability to transmit superior carcass traits. Another notable donor in Legendary's program is 235F, a full sister to Mr. Rueshaw and one of our favorite cows on the ranch.

• This Hikari son is born out of the original import cow Kaedemaru. Umemaru is a transformational sire, he corrects many conformation inadequacies, has sired many show champions, improves carcass texture and composition and is considered by many to be the top Akaushi sire ever born in North America! His semen has become very rare, currently sells for \$4,000/straw and is seldom available. He has a gran-diose reputation outside of the American Akaushi Association where he is known for being the sire or grandsire of many show champions and most of the top bulls in circulation today. RUENAMI IS A GORGEOUS DAUGHTER OF GK4 RUESHAMARU AND JC MS RUESHAW 122. SHE WAS ALSO THE GRAND CHAMPION FEMALE AT THE HOUSTON LIVESTOCK SHOW. RUENAMI IS PRODUCING SOME TRULY BEAUTIFUL DAUGHTERS AND HER SONS HAVE GONE ON TO BECOME TOP HERDSIRES AS WELL.

• Red Emperor is a son of Big Al who was the first Red Wagyu bull born outside of Japan. His sire, Dai Mitsumaru 76 ranked #1 in the Japanese Red Wagyu Directory with A4 and A5 carcasses. His dam is one of the best Red Wagyu cows in US History, Dai 8 Marunami. She was imported into the USA in 1994 as part of the Kumamoto Prefectural Cattle Improvement Project. Her Sire Dai 3 Mitsumaru 30 was ranked 3rd in the Japanese Red Wagyu Registry with A4 and A5 carcasses. The value of his progeny will make money for programs for years to come. Red Emperor is a sire and one of Landgraf Ranch's herd sire and makes amazing calves appreciated by any cattleman. HB Red Emperor is now 17 years old and no longer producing semen. RUENAMI IS A GORGEOUS DAUGHTER OF GK4 RUESHAMARU AND JC MS RUESHAW 122. SHE WAS ALSO THE GRAND CHAMPION FEMALE AT THE HOUSTON LIVESTOCK SHOW. - This Master Chef female presents the total package. SYNERGY MASTER AKIKO U01 ET has an awesome phenotype to match her loaded pedigree. Her sire Master Chef offers a unique combination of carcass traits. He won the 2015 Wagyu Champion of the World contest. His sire, Kajikari, is a direct son of the original import, Ume. The Wright Wagyu Master Chef E146 (FB19526/EAF142713) semen from this Australian import bull is nearly impossible to find. If you can find it, it usually brings HIGH dollar per straw!
- Master Chef was Academy Red Wagyu's first Full Blood Kumamoto Red. From a young age he was always a most impressive looking calf and weaned a hefty 778 lbs. and at 18 months he was 1322 lbs. 53" fat 4:3 EMA 88, IMF 5.7 and testicles 34 cm. His mature weight for the past two years was 2169 lbs. when he came in for his vaccinations in the autumn. His sire Kajikari is known for his light birth weight calves and they are structurally very correct with good depth of rib and a strong hind quarter. His mother is the great KALFB0234 who has bred so well at Academy. Master Chef is a very sound, quiet bull with a tremendous amount of meat.
- Heartbrand Red Emperor is a son of Heartbrand Big Al by Dai 8 Marunami. This bull combines the two queens of the breed in Akiko and Dai 8 Marunami. Heartbrand Red Emperor is the only Akaushi bull which closely ties to the two most famous Akaushi maternal lines while also finding in his heritage, Dai 10 Mitsumaru which is the paternal grandsire is also the previous Japanese #1 Akaushi carcass bull. The pedigree of Heartbrand Red Emperor is not only impressive on paper but he is known for giving depth, power, growth rates and marbling to his progeny. A quick look at his Australian EBV's will reveal numbers that show growth numbers regularly double the average for his contemporaries as well as the top 1% in Milk and Scrotal size.
- His consistency is renowned not only in the USA but also in Australia. Many established Akaushi breeders consider Red Emperor to be one of the greatest Akaushi carcass bulls. He is shown to be FREE OF ALL DEFECTS. --- Red Emperor is now deceased and semen is hard to find. His progeny would be a great addition for any herd!
- THE VIDEO WAS TAKEN BEFORE WE PURCHASED SYNERGY MASTER AKIKO U01 ET ON 6/7/24 - THE PAIR PICTURED SHOWS THE U01 DAM.

- We are pleased to announce a unique opportunity to acquire high-quality IVF embryos collected by Transova, flushed from an original import breeding by Big Al over Rueshaw 121. This heifer has full sisters that are known for their exceptional embryo production, fertility rates, and "sticky" embryos.

- These embryos are the result of a carefully crafted breeding strategy, using a bull that is a WSI Umemaru x JVP 702 HOMARE-27, effectively stacking the esteemed Homare lines. This breeding also incorporates Judo, an original import bull from 1975, celebrated for his exceptional marbling and competitive performance against black Wagyu of that era. By merging Judo with JVP 27-HOMARE 128, we are effectively double-stacking marbling traits along with maternal strength traits, positioning these embryos as a valuable addition to any serious breeding program.

- Additionally, it is important to note that the contemporary group of bulls related to this bull has played a significant role in establishing some of the larger Wagyu breeders in the industry, ensuring that these embryos come from a lineage known for consistent quality and performance. Don't miss out on this opportunity to enhance your herd with these remarkable embryos!

- Aaron Cooper says 4754 is a true cornerstone cow to build a herd around. She stands out in the total Akaushi program. Aaron has witnessed the last five calves, from 5 different bulls.
- Sire: Rhubarb, Rueshaw is a given what he brings to a bloodline. Over HB Barbara a Big Al daughter: She brings the Namiko maternal line. Some of the best marbling bulls ever produced.
- Dam: 4754, Topside HB H0518, Hikari out of Marunami, The Akaushi cow who was selected to lead the improvement in Kumamoto, Japan as a heifer before her live export to the USA. Bottom side, you have Shigemaru over HB T0189, she brings Tamamaru over Marunami and Big Al over Himawari. Bid with confidence with this breeding!

- HeartBrand Rika 1282Z stands out as the leading donor in Mistvale Akaushi's program. A full-sister to the maternal granddam of HeartBrand El Jefe, Rika consistently ranks among the top growth females, with her bulls often reaching yearling weights exceeding 900 lbs. Her 1282K calf notably surpassed 1,000 lbs at 12 months. We have strong confidence in her ability to pass on early and high-quality marbling traits. The Shigemaru x Akiko maternal combination has a proven history of producing excellent marbling and strong maternal qualities across various programs.
- Hakari's Legend, a rare UKB Akaushi sire from the Ultimate Kobe Beef herd, is one of the few Homare-line sons that Bill Fisher incorporated into his program during his ownership of Legendary Akaushi.

- This Hikari son is born out of the original import cow Kaedemaru. Umemaru is a transformational sire, he corrects many conformation inadequacies, has sired many show champions, improves carcass texture and composition and is considered by many to be the top Akaushi sire ever born in North America! His semen has become very rare, currently sells for \$4000/straw and is seldom available. He has a grandiose reputation outside of the American Akaushi Association where he is known for being the sire or grandsire of many show champions and most of the top bulls in circulation today. This ultra-elite daughter of Brady is double bred Rueshaw out of the LEgendary Z-Cow. Her dam is a full sister to SOR Hastings who according to legs proprietary marbling index and scored .35 higher than big al himself! Ultra-elite meat maker!

- The Kitaguni Jr. sired dam of the embryos was the \$60,000 top of the JDH Dispersal this spring with good reason. 6301D has an amazing pedigree, being a Kitaguni Jr. daughter x TF148 x Michifuku x 068 x 400 x the Kikuhana cow. All of the elite, proven, foundation sires are packed into 6301D. There are no holes here. 6301D is one of the very best Kitaguni Jr. daughters in the world in Breedplan. She possesses extreme MS and EMA EBVs and has demonstrated her ability to transmit through her amazing 44 registered progeny.
- Top 5% Marble score backed by 2x JNR combined with Kitaguni Jr. L0010 has tremendous balance combining growth, milk, and carcass traits into one package. His semen has been in tremendous demand world wide since 2020, regularly selling to thousands of dollars per straw. His progeny have been topping sales in the USA and Australia as the best way to incorporate the breed changing JNR genetics into the regular breeder's herd.

- Arubial Bond lights up the international charts for exceptional carcass traits. He has extreme EMA and MS genomic EBVs. Carcass quality is what makes the Wagyu breed special and Bond does it in a big way. He is a direct reflection of his super sire, Mayura Itoshigenami JNR. Bond is stacked on a Michifuku daughter, who in turn is a daughter of TF151 x CF504 combination.

- Huge numbers and carcass performance are offered here for the first time from one of LMR's top emerging donors, LMR Ms Notorious 3699L. Combine this with the stout G113 son from Olive Grove, S033 and you get a predicted BFI over \$500!
- Mating Predictor: Top 1% for ALL indexes: BFI \$505, SRI \$363, FTI \$304, FIT \$287; and MS +3.3, MF +0.58, and Top 5% for EMA +9.3.
- LMR Ms Notorious 3699L has only been aspirated 2 times. Be the first to own embryos by what will certainly be one of Lone Mountain's top donors sired by Mayura program's great sire, Notorious.
- 3699L's dam is LMR Ms Itomichi-4632 803T, one of Lone Mountains' finest donors. She produced 30 calves, including a Shigeshigetani steer that graded 40% IMF; Itoshigenami TF148 steers that graded 41%, 39%, 37% and 36% IMF. 803T produced 64 viable embryos.
- Sire Stack of Olive Grove S033 x Notorious x BR Itomichi/0602 4632.

• This pairing combines the extreme carcass potential of the first ever Mayura Notorious son bred and sold by Mayura Station, with the tremendous frame and maternal influence of this Sumo Michifuku F126 daughter. Mayura R0448 was purchased in 2022 for \$95,000 by HP Wagyu and commanded \$4,000/straw in his first Australian semen release. His excellent phenotype is complimented by large frame, deep stylish body, wide chest/shoulders, full hind, and great ribeye potential. His sire, Mayura Notorious, is known for producing ribeyes the size of dinner plates and has previously commanded over \$57,000/straw when semen is released. R0448's dam goes back to Itohana 2 and Kitaguni Jr, also proven carcass producers. The dam of this mating is an F126 daughter, stacked over Hirashigetayasu and Itozurudo TF151 tracing back to the Yuriko maternal line, resulting in the maternal powerhouse that is Q531G. Her calves exhibit excellent early growth and are stamped with the large frame and maternal traits of their dam. She boasts a top 1% milk EBV according to Breedplan and has been a great donor cow, converting anywhere from 16-25 freezable embryos in a flush.

• Jane, 236W, comes from a great bloodlines: Shigemaru, Big Al and Red Star. She is paired with Rueshaw Jr., the direct son of Rueshaw si what a red bull should look like. His dam is out of the great Gabni Rubi and his sire is the most rare sire in the Akaushi breed. This is your chance to get Rueshaw into your bloodlines. Rueshaw J.r is dual registered with the American Wagyu Assn. and the American Akaushi Assn. These red embryos would be a great investment.

EMBRYO GRADE I FULLBLOOD DOMESTIC ONLY LOCATION PREMIER REPRODUCTIVE SERVICES, WEATHERFORD, TX

- Laura, 99W, is one of the truly elite Shigeshigetani daughters as she descends from the highly proven original import female, Okutani. She traces directly to Okutani through breed greats Shigeshigetani, Michifuku and Haruki 2. The mating is with Hirashigetayasu 001 who was sired by DAI 20 Hirashige J287. He is out of a cow who is a daughter of Kiteruyasudoi 003 and his great grandsire is Itomoritaka 002. His lineage shows strong propensity for growth and balance with a larger frame.
- Females have very good maternal traits and milk very well. Carcasses from his offspring consistently grade on the high end but the marbling has a tendency to be moderately coarse. This is another sire preferred for producing breeding females. Laura tested SCD (VA), (4) tenderness and Hirashigetayasu tested SCD (AA), (4) tenderness.

EMBRYO GRADE I FULLBLOOD DOMESTIC ONLY LOCATION PREMIER REPRODUCTIVE SERVICES, WEATHERFORD, TX

- Yasufuku Jr. is the son of Yasufuku 1930, the bull that sired and grand sired many of the top marbling champion bulls in Japan. His dam is well known Kaneko 5. He has produced many calves, has been recognized as a major contributor to the Japanese Black Wagyu breed. He produces great cattle with sturdy bodies and the most desirable genotype (AA) for SCD testing for healthy fat marbling and (4)Tenderness. According to the Australian Wagyu Assn. breed statistics, 78% of his offspring have graded 9+ for marbling based on the Australian scale of up to 12 for marbling.
- Laura, 99W, is one of the truly elite Shigeshigetani daughters as she descends from the highly proven, original import female, Okutani. She traces directly to Okutni through breed greats Shigeshigetani, Michifuku and Haruki I. Laura as tested SCD (VA) and (4) Tenderness.

- In 1976, Rueshaw 430 was one of the very first wagyu bulls to ever leave Japan. A full blood Akaushi bull, Rueshaw was the Japanese Red National Champion Bull in 1975. He originated from the Kumamoto Region which is the heart of the Japanese Akaushi breeding capital. Rueshaw 430 was a bull imported before his time. He possessed a valuable outcross of blood in his genetic makeup that is vital to the Akaushi stud breeders.

TWA KOTSUKARI

- Here is a serious investment opportunity for your Akashi breeding program! TWA Kotsukari semen and genetics has become the object of searching by serious breeders. With this lot you don't have to buy his genetics — you can create his progeny! Kotsukari is an Akiko son sired by the highly proven breed legend, Hikari. He is an Australian sire with limited exposure in the US. This is your opportunity to secure his genetics and incorporate something new and proven into your herd! Dual registered with AAA.

- RUESHAW x JUDO x RUESHAW x AKIKO. Three generations of 1976 import sires at the front of this pedigree, followed by the original 1994 import dam, Akiko. This is the INITIAL RELEASE of Genesis semen, making you the FIRST to have access to these rare and valuable genetics. Genesis semen is NOT available on the open market. If you want something that no one else has, this is it! Nearly 50 years have passed since Genesis' sire, grandsire, and great-grandsire were imported. What little semen remains from them has sold for up to \$22,000 for a straw of Rueshaw and up to \$10,000 for a straw of Judo. BID LAST on these first 3 units of Genesis and take the inside track on this exciting next generation sire!

- One of the three imported bulls that came to the United States from Japan. Shigemaru is the most widely used of the sire lines for his breeding versatility. He is known for moderating frame size, adding body mass and structural width in his progeny. His daughters are built broody, good footed and are high maternal performers. Use Shigemaru with confidence in laying a good foundation of growth and maternal genetics.

TAMAMARU

• Tamamaru is one of the most widely used and predictable Akaushi bulls due to his consistency and legendary mother, Dai 8 Mar-unami. There's no other foundation sire that can add the length of body and stoutness of structure. His sire, Dai 5 Tamanami Tokkyu 96 provides a slight outcross to the rest of the 1994 importation. Tamamaru is a paternal sib to the foundation cow Dai 9 Kobai 73. Tamamaru is F11 free.

WAGYU GROUP BREEDPLAN NOVEMBER 2024 RUN 1														

• HB Red Emperor died in 2020 so remaining semen on this great Red sire is in limited supply. Red Emperor is a son of the legendary Big Al who was the first Red Wagyu bull born outside of Japan. His sire, Dai Mitsumaru 76 ranked #1 in the Japanese Red Wagyu Directory with A4 and A5 carcasses. His dam is one of the best Red Wagyu cows in US History, Dai 8 Marunami. She was imported into the USA in 1994 as part of the Kumamoto Prefectural Cattle Improvement Project. Her Sire Dai 3 Mitsumaru 30 was ranked 3rd in the Japanese Red Wagyu Registry with A4 and A5 carcasses. The value of his progeny will make money for programs for years to come. Red Emperor makes amazing calves appreciated by any cattleman.

- Here is one of the world's 1st homozygous polled purebred Akaushi!! This bull has it all, he is phenotypically impressive, has multiple generations of leading Heartbrand sires, is homozygous polled, and he possesses elite EPDs. His sire is Heartbrand King David 14E, the massively popular heterozygous polled bull with breed leading Weaning Weight and Yearling Weight EPDs (both top 2%). On the dam side we find leading bulls such as Heartbrand J-Prime, Shigemaru, and Big Al.

• Rojo Grande 1728 is a homozygous polled bull sired by SLA Dainiji PP Slator 442G. His dam is a daughter of the heterozygous polled bull HeartBrand King David 14E. His maternal line is equally impressive, tracing back to breed legends like Big Al, Hikari, and Shigemaru, taking you directly to Ume. 1728's elite phenotype and homozygous polled genetics make him an excellent choice to add to your breeding program.

- The value of a pedigree such as this is immeasurable here at HeartBrand. Brady 2627A is a complete outcross to three of our foundation bulls: Shigemaru, Tamamaru, and Hikari. We expect this deep, red, direct son of Rueshaw to inject the well-known marbling ability and angularity to rear skeleton of his father, as well as the maternal strength and longevity of his cornerstone dam, the "Z" cow. Brady modernizes foundation genetics and brings the mating versatility that the breed has been in search of.

- HeartBrand H0518E is a renowned Hikari son out of Dai 8 Marunami. Marunami is the iconic Akaushi cow who was selected to lead Akaushi breed improvement in Kumamoto, Japan as a heifer before her eventual live export to the United States. HeartBrand H0518E is a bull we get excited about. His progeny have extra dimension and natural muscling than progeny of other direct Hikari sons. We want to grab those desirable traits and inject them into our herd as we build better Akaushi.

- Rhubarb is sired by Rueshaw and out of a top Big Al daughter, Barbara B3518R. We feel he combines the calving ease, eye appeal and correctness of design of Rueshaw with additional skeletal width and muscularity. His dam, Barbara B3518R, is a true generator of high performance, stout featured herd bulls. Breed with confidence in this stout built outcross sire.

- Terminator T3810S is over 10 years old and still out covering fullblood cows. This speaks volumes to his functionality and transmitting ability. He is known for adding power and performance without sacrificing quality and balance. This is a direct son of Tamamaru and out of a Big Al x Fuyuko donor cow. T3810S has produced many sale bulls and top-end keeper heifers that justify his long tenure at Heart-Brand.

- HeartBrand's 20 years of intense selection for quality and productivity is represented in this bull. Raymond is very unique in his build for an Akaushi bull. He combines stout features and massive body-type with eye appeal and balance. His dam, V5909S, is deceased but has produced several featured sires and young and upcoming daughters at HeartBrand. Breed with confidence in this Shigemaru son backed by a legendary dam. This bull will leave his mark on the Akaushi breed in due time.

WAGYU GROUP BREEDPLAN NOVEMBER 2024 RUN 1

- Female Sexed!!! LMR SAMURAI 1749J is the #3 USA Sire (male with progeny) ranked by BFI (\$482) and #5 SRI (#331). 1749J leads with an amazing +3.4 MS EBV and +0.52 Marble Fineness ... top 1% is +3.2 / +0.52 respectively.
- LMR Samurai 1749J is a herd sire prospect who sold for a high of \$160,000 at the 2022 TWA Fall Harvest Sale. He leads in the top for all Wagyu Indexes (October Run 2): BFI (\$482), SRI (\$331), FTI (\$286); and FIT (\$270).
- He checks all the boxes. On progeny, he passes on his marbling with one registered progeny with +3.6 Marble Score. LMR Samurai 1749J was sired by Mayura L0010, a bonafide rock star of the international Wagyu breed who has 1919 progeny registered with the Australian Wagyu Assoc. L0010's EBV's are based on 1320 analyzed progeny and 108 carcass progeny as well 36 Mayura L10 daughters. L0010's dam, Mayura H0159, reflects Itozurudo TF151 and Kanadagene 100 bloodlines from the Aizakura maternal line.
- Samurai's dam, LMR Ms Itoshigenami 3447A, is an excellent donor in the Lone Mountain program, ranking in the Top 15% of MF EBV (+.35), and in the Top 15% for MS EBV (+2.1). 3447A has produced 22 calves including a steer by Ysaufuku Jr. that yielded 51% IMF. 0652 represents rare pathfinder genetics sired by WKS Takazakura and descending from the Chisahime maternal line. For questions, contact Kenny Landgraf at kenny@landgraf ranch.com

WAGYU GROUP BREEDPLAN NOVEMBER 2024 RUN 1														

• Female Sexed with High Growth and Marble!! He is the #1 sire wagyu SRI (+\$346) sire (proven bull with progeny) from a breeder in the USA. Add to that, this lot is also female sexed semen. • A leading L10 sire on the world stage and free of all genetic conditions. • Straws available both in USA (Elgin) and Canada (Alta). R0122H was an elite selling bull in the 2024 Elite Wagyu Sale in Australia selling for \$1200 a straw AUD. He also is a participant in the 2023 and 2024 AWA-AUS Progeny Test Program (PTP) as a link sire. • He brings growth, size and marbling. In the recent September BREEDPLAN, he leads with top Selection Indexes including SRI (+\$346), FTI (+\$283), F1TI (+\$232), and BFI (+\$397). • On individual traits, he gives you the double shot of growth and marbling with top 1% -2% on 200/400/600Day Weights, Mature Weights and Carcass weights. He scores top 10% on Marble Score (+2.3) and EMA (+6.7). R0122H has 38 progeny and is used in 8 herds with 27 progeny analyzed. • O122H is a son of Mayura L0010, who has risen to the top in the wagyu world.. These legends of the Wagyu breed are stacked on an established, leading maternal line that has produced proven sires Macquarie Wagyu C1176, TF Itohana 2, Blackmore Aizatzurudoi Y398, and Blackmore Dai Ichi Kikuzakura H017! WAGYU GROUP BREEDPLAN NOVEMBER 2024 RUN 1

• Here is a great opportunity to tap into Notorious genetics through a recessive-free son that is from a breed-leading maternal line. Notorious Hikokura has a unique pedigree of proven bulls that you won't find stacked together like this. He is Notorious x Haruki II x TF 151 x TF148 x the legendary Hikokura 1/10 cow. This bull boasts an extremely well-balanced breeding profile with great growth and maternals to complement super carcass traits, too. His maternal line has made some high profile sons and daughters and it should be expected he will pass on that superior performance to his progeny. There is tremendous power in this bloodline!

WAGYU GROUP BREEDPLAN NOVEMBER 2024 RUN 1

- LMR Kenroku 1779J is THE top Shigeshigentani sired herd bull at LMR. Kenroku is FREE of all recessive defects and has impressed at every turn of his development. He is a breed trait leader for both MS EBV (+3.3) and EMA EBV (+14.0) while also ranking in the Top 3% for ALL Wagyu Indexes: SRI (\$327), FTI (\$283), FIT (\$276), and BFI (\$427). He is the ONLY Shigeshigentani sired bull registered with the Australian Association to be equal to or better than a BFI of \$437, MS +3.3, and an EMA of +14.0. Kenroku's pedigree stacks Shigeshigentani over LMR Ms Itoshigenami 9320W, a stellar proven donor in the Lone Mountain program.
- LMR Ms Itoshigenami 9320W is sired by TF148 posting in the Top 5% of the breed for Marble Score EBV (+2.6) and Ribeye Area (+8.7). She has produced 29 calves for LMR to date and 16 carcasses averaging 37% IMF including a son by Yasufuku Jr. that achieved 43% IMF! 9320W's dam, LMR Ms Sanjirou 4P 714T, a daughter of 4P himself, offering balanced traits and a Top 10% EMA EBV of (+8.4). 714T represents rare pathfinder genetics sired by BAR R Sanjirou 4P and descending from the Chisahime maternal line combined with Michifuku. Kenroku exhibits a wonderful EBV profile and combines TF148 and Sanjirou in his pedigree.

WAGYU GROUP BREEDPLAN NOVEMBER 2024 RUN 1														

- LMR Wakura 2781K is one of the top JNR offspring in the US. He is a standout for BFI at \$502. He also ranks into the Top 1% of the breed for MS +3.8, FTI \$296, and FIT \$298 and the Top 5% for SRI \$316, EMA +8.7, and MF +0.50. What an incredibly balanced sire that even brings a positive Milk EBV of +3.
- 2781K's dam, LMR Ms Mayura 0506H, is an excellent L10 donor who sold for \$67,500 at the 2022 Passion for Prime Sale. Her dam, LMR Ms Shigeshigetani 3443A, is proving to be a superior donor in the Lone Mountain program, ranking in the Top 5% for MS EBV +2.6, SRI \$294, FTI \$263, and FIT \$257; Top 10% for BFI \$342. 3443A has produced 58 viable embryos to date and is the dam of LMR's top young donor, LMR Ms Bond 2238K.
- LMR Wakura 2781K is sired by Mayura Itoshigenami Jnr 0139, who needs no introduction as he is the undisputed "King of Australian Sires". His semen has sold to a world record \$70,000 per straw and live progeny have sold to \$280,000! JNR is a true once in a generation sire and the foundation of the Mayura Station branded beef program. He has more than 1,400 carcasses in the Mayura herd consistently grading AUS-Meat 9+, with leading ribeye area and carcass weight at a young harvest age. This translates directly to his breed-leading EBVs of MS +3.3, MF +0.47, EMA +10.1, and BFI \$452! JNR is a breed changing sire that is as proven as they come!

- Shigeshigetani is a half brother to Sanjirou sharing the same dam, Suzutani. He is also a direct son of Haruki II sired by the famous bull Monjiro J11550. Suzutani's dam sire was Shigeshigenami J10632. The Kumanami family is well known to have extremely potent marbling genes. Shigeshigetani has been used heavily at Lone Mountain with great success with 60 carcasses averaging nearly 31% IMF and numerous daughters still working in the herd. He is a well balanced sire that stamps incredible EMA (+14.0), RBV (+2.5), and MS (+2.5) on his progeny.

- WKS Kitaguni Jr is a valuable son of Kitaguni 7-8 J1530. He was born October 7, 1994 shortly after WKS Nakayuki J13943, his dam, arrived in the United States (exported by the Mannett Group). WKS Kitaguni Jr, has produced 150 carcasses for Lone Mountain with an average of 32.23%. Moreover with 142 images studied as Dam Sire, Kitaguni Jr displays his staying power averaging 34.35% IMF. WKS Kitaguni Jr, is a Trait Leader for Birth Weight EBV (-3.3) and stamps his offspring with excellent marbling ability with a +3.1 MS EBV. Kitaguni Jr has been a powerhouse for Lone Mountain, producing outstanding carcasses achieving the 50% IMF range.

WAGYU GROUP BREEDPLAN NOVEMBER 2024 RUN 1

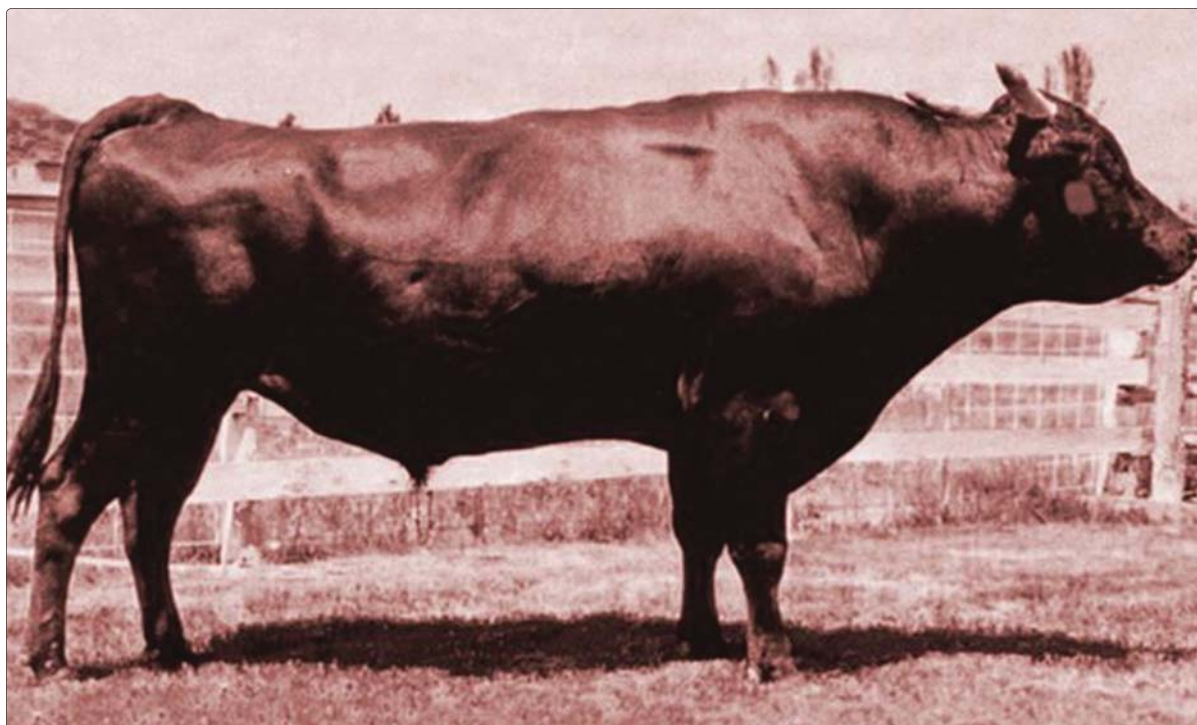

- Itoshigefuji TF147, linebred to Dai 7 Itozakura, was born 18 September 1995 at Teruo Nakamura's farm in Okayama, and exported to the US by Takeda Farms in 1997. He was shipped along with five other Takeda breeding bulls: Itoshigenami TF148, Itozuru Doi TF151, Kikuterushige TF150, Kikutsuru Doi TF146, and Mitsuhikokura TF149. Dai 30 Noboru, the dam of Itoshigefuji, was sired by Itomichi J1158. Her mother, Dai 10 Noboru 3, was sired by Itofuji J483 — the beginnings of Modoshi Kohai for Takeda-san.
- Itoshigefuji TF147 is extremely large for a Fullblood Wagyu bull, weighing roughly 2,640 lbs. According to David Blackmore, "Itoshigefuji has been the most valuable bull used in our breeding herd. His progeny's carcass quality far exceeded the expectations of his pedigree. The strength, constitution, milk and forage ability has left his daughters the best brood cows in our herd." In addition, TF147 does marble — see picture (8169U).

WAGYU GROUP BREEDPLAN NOVEMBER 2024 RUN 1

• Female Sexed with High Growth and Marble!! — Newly Available!! Shigeshigetani 1593 x F154 and free of all genetic conditions! • T157K is son of top sire GRS Mr Marble K483. He leads with top 1% Selection indexes including SRI (\$351), FTI (\$296), FTTI (\$267), and BFI (\$459). T157K is a participant in the AuWA 2024-2025 Progeny Test Program (PTP) as a link sire. • He is the thirs highest ranked (SRI \$351) progeny male in N. America out of world leading GRS Mr. Marble K483 (GRSFK0483). His grandsire on the dam side is the world leading, Sumo F154. • According to the most recent BREEDPLAN, he extremely balanced and scores SRI (+\$351), BFI (\$459), and FTI (+\$296). He leads with top 10% growth traits on 400/600/Mature Wtg and then follows that with top 5 % Carcass traits on Carcase Wtg, and top 10% on Eye Muscle Area (+7.2), top 10% Marble Score (+2.4), and top 10% Marble Fineness (+0.40). Growth with strong carcass traits built on a Shigeshigetani foundation. • His sire needs no introduction. Goorambat Mr. Marble K483 (GRSFK0483) is the top ranked son of legendary sire WKS Shigeshigetani, one of the most well rounded and consistent carcass sires. Mr Marble has one of the highest accuracies for all proven wagyu sires. K483's maternal sire is World K's Shigeshigetani, some would consider the best foundation sire in the wagyu breed outside of Japan. Of all Shigeshigetani son's, Mr Marble K483 is a trait leader for milk growth, CWT, and MS EBVs. This is due to his beautifully balanced pedigree featuring a combination of foundation sires — Shigeshigetani, Itoshigenami TF148, and Terutani 40/1. • On the dam side is the strong Sumo donor female, Sumo Fuku K174. She is well balanced genetic pedigree of 55% Tajima and 44% Shimane/Tottori. She has a notable top 5% Marble Score (+2.7) EBV which has been inherited from a high combination of Tajima sires including Sumo Itoshigenami X81. This bull is now available in the USA and we expect to have exportable straws in the near future. For questions, contact Kenny Landgraf at kenny@landgraf ranch.com
