SALE ORDER & SUPPLEMENTAL INFORMATION ...

Sale order is catalog order! Any additional information or corrections to the printed sale catalog will be available online at Live-ag.com

WATCH & BID ONLINE ONLY ... LiveAg

Watch & bid online for FREE at bid.Live-ag.com

We have made preparations to bid and buy livestock through LiveAg's bidding platform. For those unable to attend in person on sale day. Please note that all lots in the sale will be available for viewing online prior to sale day at: https://bid.live-ag.com/
If you need assistance with registration or with either bidding platform, call LiveAg at 817.533.6699

TERMS & CONDITIONS ... Cattle will sell under the standard terms and conditions of the respective Associations.

EMBRYO GUARANTEE ... Any embryos sold as stated and are not guaranteed on conception. All embryo lots will have statements regarding each with their descriptions.

REGISTRATION, TRANSFERS & EMBRYO TRANSFERS ... Within 60 days of the date of the sale, the cattle sold will be transferred (registrations) to the new owners through the offices of the American Wagyu Association, Australian Wagyu Association & American Akaushi Association. The fee is paid for by the seller.

PAYMENT ... All lots must be paid for immediately following the conclusion of the Wagyu and Akaushi "On the Strip" Sale, unless prior payment arrangements have been made with any representative of Wagyu365. Buyers are welcome to pay by credit card. If so, you will be charged a 3% fee on the total sum of your purchase.

DELIVERY ... Buyers are responsible for any shipping cost pertaining to embryo purchases and transportation of the live cattle. Waygu365 buyers and sellers will work together to make this the easiest and most efficient process possible. Export details are listed on each lot.

LIVESTOCK MORTALITY INSURANCE ... Any representative of the Wagyu365 team can assist any buyer with insurance regarding their purchases.

LIABILITY ... All persons attending the sale, do so at their own risk, legal or otherwise for their safety. The consignors, sale management, and sales staff assume no responsibility or liability for property loss or any accidents that may occur.

EPDS & W-EPDS ... All numbers are current as of 11.17.2026

DCW Ms Rue Empress 1003N's dam is by JC Ms Rueshaw who is Dove Creeks cornerstone donor and daughter of Rueshaw crossed with Red Emperor, a son of Big Al and Dai 8. He is one of the most influential sires in the Akaushi breed. Known for his ability to marble - and marble early- he consistently stamps his calves with depth, capacity and balance, moderate frame and easy keeping.

1003N's sire is DCW Mr Nikmaru 36F- Nikmaru combines 2 of Akaushi's most proven maternal lines - Umemaru and Niki into a balanced calving ease package with early marbling and strong maternal traits. Sired by Umemaru and out of a Big Al x Shig cow, he stacks carcass performance with one of the with one of the breeds most trusted females producing crosses. With low birthweights and a strong visual profile, Nikmaru is built for both feedstock and commercial success. Beautiful heifer with great performance lineage.

This mating on DCW Ms Master Rue 425N features Ms Rueshaw 74, the cornerstone donor of the Dove Creek Wagyu program. With over $1 Million in lifetime sales through her offspring and genetics, 74 has earned her place among the most influential females in the breed. A daughter of Rueshaw and grand daughter of Umemaru, she offers a rare combination of carcass strength and elite phenotype. She is a full sibling to Rueshaw 92, Rueshaw II, and Rueshaw 75 - 3 bulls that have left a lasting impression on the Akaushi breed. Many breeders consider 74 to be the best of the group, consistently transmitting power, presence and performance to her progeny. She is now 14 years young and continues to produce consistently exquisite offspring that you can pick right out of the pasture. She definitely puts her stamp on them!

DCW Ms Master Rue's sire - The Wright Wagyu Master Chef adds a dynamic sire to her pedigree. Known for producing cattle with style, balance, and exceptional carcass value, he brings the consistency and quality needed to complement a donor of 74's caliber. This mating was designed to deliver calves that will stand out in the pasture and excel on the rail- an elite genetic package for breeders focused on carcass merit and maternal value. Ms Master Rue has the pedigree and phenotype to build an entire program around.

DCW Ms Marble 2069N is already an exceptional heifer phenotypically with a pedigree that is backed by performance - tested bloodlines and marble rich heritage. Her dam - LAG 2069F is a Brady daughter backed by Big Al and dai 8. She has also been a consistent calving ease cow and is the dam of LAG Umemaru Marble Master 37k who has the distinction of being one of the highest IMF scanned bulls at LAG to date. A true testament to the power of her pedigree.

Her sire- DCW Mr Nikmaru 36F - the senior herd sire at Dove Creek Wagyu brings together two powerhouse maternal lines in Akaushi- Umemaru and Niki- delivering balanced combination of calving ease, early marbling , and maternal strength. Sired by Umemaru and out of a Shig x Akiko cow, Nikmaru stacks proven carcass genetics with one of the most reliable maternal combinations in the breed. The Shig x Akiko cross, especially through Niki, has long been respected for producing females with excellent udder quality, disposition, and early marbling. As more ultrasound and carcass data rolls in on Umemaru and his sons, the results continue to validate his role as a leading carcass sire in the Akaushi breed. Nikmaru carries that forward in a low birthweight, phenotypically balanced package built for both feedstock and commercial success.

Redstone 4542 is offered here as a pregnant cow along with her February bull calf. 4542 has generations of Heartbrand breeding as her strong foundation. She and her calf are descended from Heartbrand Himawari on the maternal side of the pedigree. Himawari has had a large impact on the Heartbrand breeding program. 4542 is sired by a Judo son backed by the excellent, proven Homare line. The bottom side of 4542 includes the foundation sires Shigemaru, Hikari, Tamamaru, and Big Al. The sire of the bull calf, 3700P, is Texas Ten Cattle 706, who is a Big Al son from the Haruko line. This is a great genetic investment package!

La Fortaleza 9614 is offered as a bred cow along with her 8 month daughter. 9614 packs a serious genetic punch. She traces back to the impactful Ume on her maternal side. The Ume genetics are always in demand and bring a premium when offered for sale. 9614 is very attractive as she is in her prime for production and boasts a loaded pedigree. Her maternal side features a stacking of highly proven sires — Tamamaru x Hikari x Shigemaru directly to Ume herself. The sire of the heifer calf, 3698p, is Texas Ten Cattle 706, who is a Big Al son from the Haruko line. This is a great genetic investment package featuring a bred cow and her daughter!

LOT 6A - Bull Calf, born 05.30.2026 (AAA# AF387331 / AWA# FB145532). Sired by Rueshaw 430 (AF6808).

This young bull is aptly named Paycheck! He is nearly as close to original import/foundation genetics as you can possibly get. His sire, Rueshaw, was one of the two original Akaushi imports to the US in the 1970's. His maternal granddam, Marunami, was an original Akaushi female import in the 90's. Rueshaw and Marunami have proven themselves as an elite, proven sire and dam respectively within the Akaushi breed. They have been proven moneymakers. Paycheck X10P marries them in this pedigree. As a bonus, Big Al is sandwiched between Rueshaw and Marunami as the maternal grandsire! Try to find a pedigree that competes with this young bull. Invest in these genetics and Paycheck will return a bigger paycheck for the new owner!

Selling with five-year-old, Angus recip mother.

Bred to HEARTBRAND 9947M (AF331009)- ECD: April 2027

Heartbrand 2209N is a bred heifer that will be a tremendous herd-building female. She is sired by one of the all-time great, proven Heartbrand-bred bulls, H0518E. H0518E is an outstanding Hikari son from the highly proven Marunami. The maternal side of 2209N traces directly to the well-known foundation cow, Fuyuko. Fuyuko has made her mark within the breed. In this pedigree she appears as the maternal great-granddam. The legendary foundation sires, Shigemaru and Big Al, anchor this exceptional pedigree. 2209N represents a significant investment opportunity to acquire breed-leading genetics. The fact that she is pregnant and carrying the next generation ads to her tremendous upside!

La Fortaleza 9605 is an excellent cow in the prime of her breeding career. 9605 boasts a superior pedigree. She is sired by a Judo son, 4V 1505, who traces to Homare on his maternal side. Her dam is sired by a Tamamaru son from the Ume line. Beyond that, her sire stacks continues its extreme strength with Shigemaru x Hikari x Tamamaru x Dai 10 Mitsumaru. The powerful Ume is the fountainhead of the maternal line. This is a stacked pedigree backing a cow that will crank out a profit for years to come. A bonus is that she is pregnant and carrying the next generation. This has profitability written all over it! Great genetics and a two in one package.

Confirmed bred to DCW Mr Nikmaru 36F AF120954; ECD mid-April 2027.

DCW Ms Polled Empress's lineage combines some of the most proven marbling genetics in the Akaushi breed while also adding the polled statice! Her pedigree is packed full of some of the very best carcass producers that Akaushi has to offer. Including LAG 2069F- the dam of LAG Umemaru Marble Master 37K. Her lineage includes Umemaru, Rueshaw and the Z Cow through Brady, Big Al and B4535- a full sister to Red Emperor.

Ms Polled Empress is bred to DCW Mr Nikmaru 36F for Spring 2027. Mr Nikmaru is the senior herdsire at Dove Creek Wagyu. Nikmaru brings together two powerhouse maternal lines in Akaushi- Umemaru and Niki- delivering a balanced combination of calving ease, early marbling, and maternal strength. Sired by Umemaru and out of a Shig x Akiko cow, Nikmaru stacks proven carcass genetics with one of the most reliable maternal combinations in the breed. The Shig x Akiko cross, especially through Niki, has long been respected for producing females with excellent udder quality, disposition, and early marbling. As more Ultrasound and carcass data rolls in on Umemaru and his sons, the results continue to validate his roll as a leading carcass sire in the Akaushi breed. Nikmaru carries that forward in a low birthweight, phenotypically balanced package built for both feedstock and commercial success.

Ideal Beef 851 is a bred heifer sired by Heartbrand Sake. Sake is a descendent of the great Akiko. The maternal side of 851 is an amazing line-up of Akaushi genetics. The sire stack is Tamamaru x Hikari x Tamamaru x Dai 10 Mitsumaru. The foundation of the stack is the breed legend, Ume. This is an absolutely elite pedigree that will catch the attention of most all breeders! Don't miss out on this fantastic bred female that already carries the next generation.

FX014 is one of the highest marbling red Wagyu bulls in the Australian database, and has created a lot of excitement the last few years in the US. The dam of this heifer, 2102F, has done a tremendous job for Skyview Wagyu, with over $100,000 in sales. I think she's one of the top heifers from this mating I've seen and I'm committed to selling my best in sales. I'm willing to keep the heifer and have her bred to my Holy War bull, should the new buyer desire. She is registered AAA, and AWA registration is pending.

DL Farms 201N is a heterozygous polled daughter of CG All Polled. All Polled is a son of the popular homozygous polled Saisho. The bottom side of the 201N pedigree is fullblood from the great Akiko cow. The maternal line features generations of proven Heartbrand breeding, with the foundation built by Shigemaru, Big Al, and Tamamaru. This may well be the way of the future with polled genetics built on a breed-leading fullblood maternal line. You have the option to continue breeding polled or circle back to a fullblood bull.

BMR MR Judo 34J is a five-year-old bull ready to go to work! His sire is Judo, one of the four original imports into the US in the 1970's. Rueshaw was one of the other original imports and together with Judo, they were the only two Akaushi bulls in the import group. Judo and Rueshaw provide a great outcross opportunity to the later import Akaushi genetics. The bottom side of 34J's pedigree is as elite as can be found anywhere. There are two crosses to the incomparable Akiko. One cross is through the maternal grandsire of 34J, D & H Rueshaw JR 98-1 6019-D. The other is the maternal line of 34J, which traces directly to Akiko. The sire stack includes proven sires C221, Big Al, Tamamaru, and then Akiko herself!

BMR MR Judo 34J is one of the most elite pedigreed bull the breed has to offer and is built on performance proven genetics!

Eligible to be registered with AAA.

JC MS RUESHAW 74

JC Ms Rueshaw 74 is the cornerstone donor of the Dove Creek Wagyu program. With over a $million in lifetime sales through her offspring and genetics. 74 has earned her place among the most influential females in the breed. A daughter of Rueshaw and a granddaughter of Umemaru, she offers a rare combination of carcass strength and elite phenotype. She is a full sibling to Rueshaw 92, Rueshaw II, Rueshaw 75- three bulls that have been foundational in the development of American Akaushi. Many consider 74 to be the best of the group, offering elite carcass potential in a truly powerful, phenotypically balanced package.

SOR 1083- Big Al x Kaedemaru 2 and a full brother to LAG Hastings. 1083 is known for carcass predictabillity, easy calving, great growth and an incredibly amazing disposition. His offspring are very nice phenotypically as well and he is also the sire of Houston Reserve Grand Champion Kiro No Yuro(Foggy Night)

SIRE, ASHWOOD FX014

FX14, a Big Al x TWA Mekata son, is paired with CGX UME 3439L ET, an Academy International P107 daughter out of CGX MarblingX 919G ET.

Her pedigree combines Kalanga Red Star with Big Al and Heartbrand H0337N ET.

3439L ranks in the top 2% for weaning and yearling weight, top 17% for milk, and top 5% for total maternal. This mating places Big Al as both the paternal grandsire and a maternal great-grandsire of the resulting calves.

Direct FX14 progeny backed by strong donor growth and maternal rankings.

SIRE, ASHWOOD F X014

This embryo package represents an incredible opportunity. The sire is the super-bull Ashwood F X014, whose semen and genetics have been extremely difficult to acquire. F X014 is a Big Al son of TWA Mekata, who is a Hikari daughter of the famed Namiko. The donor dam is the well- known Rueshaw daughter, JC MS Rueshaw 121. 121 is a Rueshaw daughter that is a granddaughter of the breed-impacting Homare J 30E. This line has made some true superstars. 121 herself has an enviable pedigree with a sire stack of Rueshaw x Hikari x Judo x Namaimaru. This genetic package may be impossible to duplicate. The resulting calves will have endless possibilities and huge futures ahead of them. Performance proven genetics with a mostly outcross genetic lineup — don't miss out!

JC Rueshaw 75's sire stack is an impressive Rueshaw x WSI Umemaru x Judo x JVP Kuniaso! Rueshaw and WSI Umemaru are also known for their strengths in carcass quality, producing outstanding marbling and ribeye area. JC Rueshaw 75 was also the 2014 and 2015 Grand Champion Bull at the Houston Livestock Show possessing unprecedented carcass traits! This bull is an ideal animal to create a highly profitable Akaushi program around!

The donor dam of these embryos, Natsuki, is a rare daughter of Kotsukari. Natsuki features the legendary Akiko on both sides of her pedigree with Kotsukari, who is a Hikari son of Akiko, as her sire and then Akiko positioned as the foundation of her maternal side. The maternal line features an unrivaled stack of import and original sires in Judo x Shigemaru x Big Al x Tama- maru x Akiko.

Sired by WSI Umemaru, this Hikari son is born out of the original import cow Kaedemaru. Umemaru is a transformational sire, he corrects many conformation inadequacies, has sired many show champions, improves carcass texture and composition and is considered by many to be the top Akaushi sire ever born in North America! His semen has become very rare, currently sells for $4000/straw and is seldom available. He has a grandiose reputation outside of the American Akaushi Association where he is known for being the sire or grandsire of many show champions and most of the top bulls in circulation today.

The dam here is a great Rueshaw daughter, JC MS Rueshaw 190. She is a wonderful Homare cow that connects directly to the import Homare through proven, breed leading sires Hikari, Judo, and Namimaru. This pedigree speaks for itself!

The Wright Wagyu Master Chef offers an elite combination of carcass traits from his sire TWA Kijikari (Hikari x Ume), and top 1% of the breed for growth and maternal traits from the Shigemaru and Homare lines.. He is a leading Australian Akaushi sire with very limited semen available.

Here is a young cow that has become one of our visitor favorites! This is a dream cross - Kotsukari X Ashwood Park Virile. Yumika's dam was a cow that was a foot longer and wider than anything we had seen. Yumika displays extreme muscle, beautiful breed characteristics, and shows incredible width through the rump and over her top. This pedigree is stacked with extreme females - a rare opportunity for an all Australian pedigree!

Export: USA, Australia, South America

If you can't get TWA Kajikari (Hikari x Ume) through his son Master Chef, then we suggest getting him through his grandson, Bald Ridge Henshin! Henshin has a loaded pedigree with breed greats such as Hikari, Ume, Big Al, Namiko and Akiko. He is a deep flanked, well balanced bull that will sire a propensity for elite carcass progeny. We have been very impressed by the Henshin progeny we have seen and we believe he will be a key piece to our breeding program moving forward.

TWA Kotsukari is the only Hikari x Akiko son ever bred and therefore extremely rare genetics given he was born in Australia and few straws were imported to the USA. Hikari x Akiko marries the two best carcass traits animals to have been exported from Japan and stamps elite carcass traits in his progeny. Acura hails from the Akiko maternal known as having the premier carcass traits line in the breed. Akiko herself is the dam of proven sires Big Al, Heart Brand Red Star, TWA Kotsukari, and Come and Take It!

The dam of this lot was 2024 Wagyu Champion of the world! She is a daughter of GK Rueshamaru bringing Rueshaw and Keademaru's carcass traits to this donor dam. The sire stack behind her is just as impressive being Ashwood Park Virile x Judo x Shigemaru x Big Al x Tamamaru x Akiko! This donor dam is sure to imprint elite carcass ability!

Rapid Bay Impact ET "CHAMPION OF THE WORLD 2025 " We have never had a bull perform like he has — 204 days 786 lbs.- 12 months 1334 lbs., and at 20 months 1880 lbs. This bull is so attractive and a great ambassador for the Akaushi breed .. so mobile, tracks straight, heavy muscled, EXTREME wide on top. Master Chef son of IWG MS Judo 73Z.

Here is a true feature embryo lot, the dam is from the heart of Rapid Bay's elite donor herd. Rapid Bay Jojo is a direct daughter of Kotsukari, who is the only Hikari son of Akiko and extremely rare with few straws imported from Australia. Hikari x Akiko marries the two best carcass traits animals to have been exported from Japan and stamps elite carcass traits in his progeny. Behind this is more Australian Akaushi royalty in Ashwood Park Virile (Shigemaru x Hikari x Namiko) and Gabni Rubi (Shigemaru x Big AL x Tamamrau x Akiko). Ashwood Park Virile and his brother Ashwood F X014 are elite proven carcass traits sires in Australia. Take note this pedigree is double bred to Akiko through Kotsukari and Gabni Rubi cementing the Queen of the breed Akiko's influence!

Rapid Bay Shindo is the sire of these high-powered embryos. Shindo is an early Master Chef son out of the tremendous brood cow, IWG MS Judo 73Z. Judo 73Z is a Judo daughter from the well-known Gabni Rubi who was imported from Australia. The donor dam, SB 2777, has a loaded pedigree featuring Australian sourced genetics. Bald Ridge Henshin is her maternal grandsire and is proving to be an excellent bull. Henshin is a Kalanga Kajikari son from the fantastic Namiko maternal line that produced the breed leading sire, Ashwood Park F X014. Further back is the proven sire Ashwood Park Virile and then Gabni Rubi. Rubi appears on both sides of pedigree on SB 2777. This positions the legendary Akiko as the foundation female for the sire and dam of these embryos. This is an amazing genetic investment opportunity!

SHIGEMARU
AKIKO
HIKARI
RWA HOMARE BLUE 2
BIG AL
DAI-HACHI 8 MARUNAMI
WSI UMEMARU
JVP KUNIASO J 6124F

This mating combines Kalanga Red Star C402, a Heartbrand Red Star son out of Kalanga Hikahomare VW36, with JC Akasakae 97, a Red Emperor daughter out of JC Ms Umemaru 30. The resulting pedigree brings together Shigemaru, Hikari, Big Al and WSI Umemaru through two distinct parental combinations.

Through his sire, Kalanga Red Star carries the direct Shigemaru × Akiko mating, placing foundation female Akiko as the embryos' paternal great-granddam. Akasakae adds another Akiko connection through Red Emperor's sire, Big Al, alongside the Dai 8 Marunami influence through Red Emperor's dam.

The donor's maternal side provides the WSI Umemaru × JVP Kuniaso J 6124F pedigree of JC Ms Umemaru 30, tracing to foundation female JVP Kunisakae. Akasakae is a maternal sister to JC Rueshaw 75, Rueshaw II and JC Ms Rueshaw 74, giving these embryos a close connection to that established cow family.

For breeders seeking Akiko influence paired with the Kunisakae maternal line, this mating offers both within a pedigree that also incorporates the Homare and Kaedemaru families.

SIRE, RUESHAW 430

This mating pairs foundation sire Rueshaw 430 with JC Akasakae 97 ET, a Red Emperor daughter out of JC Ms Umemaru 30. It combines direct Rueshaw breeding with Red Emperor's Big Al × Dai-Hachi 8 Marunami pedigree and the maternal family behind JC Rueshaw 75 and Rueshaw II.

Akasakae is a maternal half-sister to those sires through their shared dam, JC Ms Umemaru 30. That places JC30 as the maternal granddam of the resulting calves, with WSI Umemaru and JVP Kuniaso J 6124F immediately behind her.

The mating reunites Rueshaw with the JC30 family through a Red Emperor daughter, adding Big Al and Marunami while retaining a close connection to the Rueshaw × JC30 combination.

An opportunity to produce direct Rueshaw sons and daughters backed by Red Emperor and the established JC Ms Umemaru 30 maternal line.

DAM, JC AKASAKAE ET

This mating combines the Shigemaru × Tamamaru × Kaedemaru pedigree of LAG "Boomer" 1105D ET with the Red Emperor × WSI Umemaru × Judo pedigree of JC Akasakae. Boomer is a direct Shigemaru son out of WSI Kaedemaru 2, a Tamamaru daughter of original import female Kaedemaru. His phenotype earned Reserve Grand Champion honors at both the 2018 National Western Stock Show and Houston Livestock Show.

JC Akasakae is a Red Emperor daughter out of JC Ms Umemaru 30, making her a maternal sister to JC Rueshaw 75, Rueshaw II and JC Ms Rueshaw 74. Her maternal line traces through JVP Kuniaso J 6124F to foundation female JVP Kunisakae.

The pedigree brings Kaedemaru into both sides of the mating - through Boomer's maternal granddam and through WSI Umemaru on the donor side. This creates a deliberate connection to the Kaedemaru family while combining it with the Kunisakae maternal line, offering breeders a foundation-rich mating for developing future breeding stock.

SIRE, MR HONIO MASAMUNE

DAM, SMW G223E

This mating pairs LAG Mr Honjo Masamune, a Red Emperor son out of Kaedemaru, with SMW G223E, a direct Hikari daughter. The resulting calves will have Kaedemaru as their paternal granddam and Hikari as their maternal grandsire, placing both close to the front of the pedigree.

Honjo is a maternal half-brother to WSI Umemaru. The two bulls share Kaedemaru as their dam, but Honjo brings Red Emperor's Big Al × Dai-Hachi 8 Marunami breeding. With Hikari coming through G223E, this mating brings together both parents of WSI Umemaru through separate branches of the pedigree.

G223E's maternal side also carries GK4 Rueshamaru and Red Emperor. GK4 Rueshamaru brings in Rueshaw 430, while Red Emperor appears on both sides of the mating, reinforcing the Big Al and Marunami influence.

These female-sexed embryos offer an opportunity to develop direct Honjo daughters with Kaedemaru and Hikari close in the pedigree, backed by Rueshaw 430 and two paths to Red Emperor.

SIRE, RUESHAW 430

DAM, JC MS RUESHAW 190

Direct Rueshaw genetics backed by the established Homare cow family. With Rueshaw 430 semen having commanded as much as $22,000 per straw, this mating brings his influence to the forefront on both sides of the pedigree.

JC MS Rueshaw 190 is a Rueshaw daughter out of JC MS Hikari 40, a Hikari × JVP MS Homare J 30E female. Her maternal pedigree continues through Judo to JVP 27-Homare 128, combining three foundation sires with a respected maternal line.

With Rueshaw 430 as both sire and maternal grandsire, these embryos offer breeders a concentrated source of his genetics, supported by Hikari and the depth of the Homare family.

Big Al is the sire of this embryo lot. Big Al is arguably the most dominant sire of the breed with tons of data behind him, plus he is a son of the legendary brood cow, Akiko. The donor, 9536Y, is a great granddaughter of the proven foundation female Fuyuko. These embryos represent rock-solid genetics with proven performance behind them. They are backed by Shigemaru, Big Al, and Dai3 Mitsumaru on the bottom side of the donor's pedigree. This is a special opportunity to acquire Big Al genetics.

Big Al is the legendary Dai 10 Mitsumaru 76 son of Akiko and is highly proven with elite EPDs. To this day Big Al has top 30% growth and maternal EPDs along with top 10% carcass EPD for Ribeye Area, Marbling, and Carcass Index! On top of his fantastic EPDs, he is known for making incredible females with growth, strength, maternal traits, and longevity. Big Al is considered by many to be the greatest Akaushi bull of all-time! The donor dam featured here is Heartbrand Jessica. Jessica a daughter of the leading proven Shigemaru son Heartbrand Joe. Joe has balanced elite EPDs feature multiple top 5% traits. On top of this he has elite Indexes for both Growth and Carcass in the top 15% of the breed. Behind that Jessica has a sire stack of Tamamaru x Big Al x Himawari. This mating will create balanced and elite Akaushi cattle that can be the foundation of a breeding program.

Judo was imported with Rueshaw into America in 1976 for research purposes. He is an outcross to the 1994 importation of reds. Semen collected is limited and in high demand in the states. Judo is an F11 carrier.

This young cow packs incredible Akaushi genetics into her profile! Her sire is the popular Hastings, who is a Big Al son from the great Kaedemaru 2, who in turn is a Tamamaru daughter if the matriarch, Kaedemaru. The dam of this lot has an equally powerful pedigree which pulls in the blood of Akiko and Marunami through Red Emperor. The next generation back combines a double dose of the legendary Namiko through both the maternal line of the pedigree and the top side with the Australian sire, Kalanga Kajikari. This lot is elite genetics at the highest level!

These embryos are sired by one of the all-time great, proven sires from Heartbrand, Joe S5394S. Joe is a Shigemaru son out of a Big Al daughter of Fuyuko. Joe has nearly 1200 registered progeny. His EPDs reflect the highly sought-after combination of calving ease and low birthweights, coupled with spectacular growth and maternal traits. The donor dam of the embryos, Heartbrand 3409B, is a Fuyuko descendent. 3409B is a daughter of the proven Heartbrand Dozer. Her maternal sire stack is impeccable — featuring Shigemaru x Tamamaru x Big Al directly to Fuyuko. These embryos are a fantastic opportunity to improve a herd base or start a herd.

SIRE, TAMAMARU

DAM, GMNY RED RIDER GQ4

This mating combines foundation sire Tamamaru's growth, body length, and maternal attributes with GMKY Red Rider Q04's demonstrated carcass production. The goal is to complement her carcass quality with the capacity and functionality needed in productive breeding cattle.

Tamamaru is a direct son of Dai-Go 5 Tamanami Tokkyu 96 and Dai-Hachi 8 Marunami. His breeding record supports his use for adding extension and growth, along with favorable udder conformation in daughters. Marunami occupies the paternal granddam position of the resulting calves, keeping her influence close to the front of the pedigree.

Red Rider Q04 is a Heartbrand Samsung S0947P daughter out of a Big Al × Fuyuko female. Samsung contributes Shigemaru × Haruko breeding, placing Shigemaru, Haruko, Big Al, and Fuyuko as the maternal great-grandparents of these calves. Fuyuko anchors the direct maternal line, while Big Al also brings the influence of his dam, Akiko.

Red Rider's carcass production has supported her expanding role in our donor program. This pairing offers direct Tamamaru sons and daughters from a Samsung × Big Al × Fuyuko donor, combining an established foundation sire with a maternal line already delivering quality in our program.

DAM, SWENSON KELLY 307

HeartBrand's 20 plus years of intense selection for quality and productivity is represented in this bull. Raymond is very unique in his build for an Akaushi bull. He combines stout features and massive body-type with eye appeal and balance. His dam, V5909S, is deceased but has produced several featured sires and young and upcoming daughters at HeartBrand. Breed with confidence in this Shigemaru son backed by a legendary dam. This bull will leave his mark on the Akaushi breed in due time. The dam is a balanced bred female with a top side of the pedigree featuring the genetics of Tamamaru, Big Al, Hikari, Shigemaru, and Akiko. This balance of growth, maternals, and carcass traits is complimented by further Akiko influence on the bottom side of her pedigree. Big Al is featured twice in the 1st two generations cementing the potential of this donor dam.

This is a superb genetic opportunity being offered as three embryos. The sire is the immensely popular SOR Hiromitsu, an outstanding son of Umemaru and the legendary Kaedemaru 2. Hiromitsu is highly proven with nearly 400 registered offspring in leading herds around the country. The donor dam of the embryos is Julia 632Z. She descends directly from the immortal breed matron, Akiko. The Akiko line has proven itself as breed defining through innumerable outstanding bulls and females, highlighted by Big Al. The pedigree of Julia 632Z is loaded with sires such as Shigemaru, Hikari, Big Al, Tamamaru, and H0518E. These embryos bank genetics that will take any program to the next level.

Hiromitsu is the sire of this embryo package. He is the popular Umemaru son of Kaedemaru 2. This makes him double-bred to the amazing Kaedemaru. The donor dam, 2211K, is nearly as closely bred to an original import female as can be found anywhere! She is an actual maternal granddaughter of Fuyuko! Fuyuko has been one the impactful females of the breed. 2211K is a daughter of one of the elite Heartbrand sires, Heartbrand H0518E. H0518E is a highly proven son of Hikari from the legendary Marunami. 2211K has been built from H0518E x Big Al x Fuyuko. These embryos are the real deal of Akaushi genetics. This is an opportunity to get extremely close to original foundation, import genetics on both sides of the pedigree, which is becoming increasingly difficult to acquire.

Sired by Come and Take It, the Heartbrand H0518 son of Akiko, these embryos are certain to have elite carcass quality from the combination of Hikari and Akiko genetics in one package. Heartbrand Marilyn is the donor dam of this lot and is from the Ume maternal line. She traces directly to the "the Elephant Cow" Heartbrand T0504E herself! She has an incredible pedigree with highly proven sires Tamamaru, Big Al, and Shigemaru then "the Elephant Cow" and Ume on maternal side. These embryos provide a breeder with an excellent foundation of carcass traits, growth, and maternal traits to breed from.

TWA Kotsukari is the only Hikari x Akiko son ever bred and therefore extremely rare genetics given he was born in Australia and few straws were imported to the USA. Hikari x Akiko marries the two best carcass traits animals to have been exported from Japan and stamps elite carcass traits in his progeny. Acura hails from the Akiko maternal known as having the premier carcass traits line in the breed. Akiko herself is the dam of proven sires Big Al, Heart Brand Red Star, TWA Kotsukari, and Come and Take It!

First Public Offering of Conventional Semen A direct son of Rueshaw 430, whose semen has commanded $22,000 per straw, CGX Ruefus 3411L is backed by RMW Hoshiko D18—the $104,000 donor anchoring our breeding program.

D18 combines JC Rueshaw 75 with Australian Kalanga genetics and the Namiko maternal line. Her sire, JC Rueshaw 75, is a Rueshaw × JC Ms Umemaru 30 son, placing Rueshaw as both sire and maternal great-grandsire of CGX Ruefus 3411L.

Used extensively across our donor herd, CGX Ruefus 3411L carries genetics we have committed to our own next generation. This single straw marks the first conventional semen offered publicly—and the only public opportunity to secure semen from CGX Ruefus 3411L until spring 2027. With winter matings ahead, this is a rare chance to access these genetics now, before the next public release.

This lot is a fantastic opportunity to move your breeding program forward as Shindo introduces the next generation of superior genetics from the heralded Akikos. Shindo's sire is the amazing Master Chef, who transmits outstanding phenotype and heavy muscling, along with incorporating rare Kajikari blood. If you were not able to acquire Master Chef semen, Shindo is a great way to tap into his genetics. The dam of Shindo is the Judo daughter, Judo 73Z. She has established herself an icon of the breed with her proven ability to transmit elite performance to her numerous progeny. The 73Z cow is built on the powerful foundation of Akiko through sires such as Shigemaru, Big Al, and Tamamaru. Shindo will be a game-changer!

Big Al holds a special place in Akaushi history as the first bull born outside of Japan, arriving in January 1995. Nearly a fullblood brother to the legendary Hikari, he shares the same sire - Dai 10 Mitsumaru - and dam line through Akiko, a Namimaru daughter. A cornerstone of many breeding programs, Big Al has earned his reputation as one of the most influential foundation sires. His legacy is clear in his offspring: powerful performance, consistent calving ease, and strong maternal traits. Big Al is also F11 free, adding to his genetic value and appeal.

We are proud to offer 4 conventional units by SOR Big Al, a long-bodied, powerfully constructed, deep ribbed, and well-footed son of Heartbrand Big Al over UKB Ms Hikari Homare J30E (FB 11800). SOR Big Al is linebred to Dai 10 Mitsumaru through HB Big Al and Hikari, and Dai 2 Shigenami through Namimaru (half-brother of Shigemaru). SOR Big Al's pedigree also boasts outcross genetics through his dam, UKB Ms Hikari Homare J30E, who is the granddaughter of original import dam JVP 27 Homare 128. The J30E maternal line consistently has displayed high heritability of unsurpassed length and structure.

SOR Big Al's sire, Heartbrand Big Al, is considered by many Akaushi breeders to be one of the premier foundation Akaushi bulls, and he is renowned for his 200-day, 400-day, 600-day, mature weight, and carcass weights as being the only foundation Akaushi bull to be found in the top 30 in all growth categories according to the AUWA EBV's. Furthermore, Heartbrand Big Al has produced some of the best cows and heifers in the breed, which display excellent maternal characteristics and milking ability.

If you are looking for length, structure, and marbling, then look no further! SOR Big Al is packed with the best Akaushi genetics available in the US and displays the phenotype associated to his pedigree. Whether you are looking for Akaushi genetics for seedstock breeding or desire a F1 bull that affords the ability to increase grade and yield quality without sacrificing growth across commercial herds, SOR Big Al is the Akaushi bull for you!

Semen is F.O.B.

One of the three imported bulls that came to the United States from Japan. Shigemaru is the most widely used of the sire lines for his breeding versatility. He is known for moderating frame size, adding body mass and structural width in his progeny. His daughters are built broody, good footed and are high maternal performers. Use Shigemaru with confidence in laying a good foundation of growth and maternal genetics.

Heartbrand Renegade 7099K is a heterozygous polled bull featured in the Heartbrand program. He is a son of Rueshaw, who was part of the historic, original Japanese import in the 1970's. 7099K is the result of multiple generations of Heartbrand breeding and goes back to the proven sire, Heartbrand H0518E, on the bottom side. 7099K is the ideal kind of curve bending sire with low birth weights that transform into explosive growth and superior weights at weaning and yearling. The bonus of 7099K is the fact that he is heterozygous polled for breeders desiring to work towards a polled Akaushi program. This represents a significant opportunity to acquire proven, polled genetics.

Heartbrand Heavy Hauler is a son of the popular Heartbrand Charlie bull, contributing genetics of Dai 8 Marunami, Hikari, Shigemaru, and Ume! Creating an ideal blend of carcass and growth traits from these elite foundation bloodlines. The bottom side of Heavy Hauler's pedigree features another heavy influence of Ume and the famous "Elephant Cow"! Through his dam's sire Heartbrand H2460R and stacked on the direct maternal line of T0504E the "Elephant Cow" herself! Known for contributing the ability to produce progeny that perform in all facets, growth, milk, conformation, and of course exceptional marbling. This sire is clearly bred for balance and profitability in all sectors of the cattle industry!

Sor Mr. Honjo Masamune 1099 brings well know and proven calving ease, growth, and the carcass traits that he inherited from his sire Red Emperor and dam Kaedemaru. But who is Honjo? Honjo's story is interesting…When his dam Kaedemaru was 19 and after numerous failed attempts, an Oocyte was successfully collected and fertilized, the resultant birth being Honjo. He became the final calf ever to be produced by Kaedemaru, and he is the half-brother to both Umemaru and Kaedemaru #2. All three have now crossed the rainbow bridge, the boys succumb to injuries and Kaedemaru #2 to old age…However when it comes to genetic preservation, Honjo, will likely be the last man standing. For experimental purposes we bred many of the same cows to Umemaru, Honjo and Kotsukari, Honjo has never disappointed us and we have a good collection of his daughters in our herd.

Holy War is the newest addition to my herd and a breeding machine. He carries a proven pedigree of carcass, phenotype, docility, and functionality that will fit well in any program. Holy War is a proven calving ease bull with 12 calves being 64 pounds or less, making him a solid choice for first calf heifers, as well as cows. He has a 41 cm scrotal, and has some of the highest quality Akaushi semen I'm aware of. He collected a high volume of sexed heifer semen, and we are excited to offer this lot in the Vegas sale. HW is registered with the AAA, Australia and registration is pending with the AWA.

Mr Nikmaru brings together two powerhouse maternal lines in Akaushi-Umemaru and Niki- delivering a balanced combination of carving ease, early marbling, and maternal strength. Sired by Umemaru and out of a Shig x Akiko cow, Nikmaru stacks proven carcass genetics with one of the most reliable maternal combinations in the breed. The Shig x Akiko cross, especially through Niki, has long been respected for producing females with excellent udder quality, disposition, and early marbling. As more ultrasound and carcass data rolls in on Umemaru and his sons, the results continue to validate his role as a leading carcass sire in the Akaushi breed. Nikmaru carries that forward in a low birthweight , phenotypically balanced package built for both feedstock and commercial success.

Tamamaru is one of the most widely used and predictable Akaushi bulls due to his consistency and legendary mother, Dai 8 Mar- unami. There's no other foundation sire that can add the length of body and stoutness of structure. His sire, Dai 5 Tamanami Tokkyu 96 provides a slight outcross to the rest of the 1994 importation. Tamamaru is a paternal sib to the foundation cow Dai 9 Kobai 73. Tamamaru is F11 free.

2019 Houston Grand Champion

JVS Big Al E58 ET is a phenotypic powerhouse and everything we come to expect out of a direct Heartbrand Big Al son. The balance and structure of HB Big Al is on full display here.

Where this pedigree truly turns interesting is through the dam's pedigree. The dam of JVS E58 is ROA Miss Shige, who is the full sister to VBV ROA Red Galaxy. Other full siblings to JVS E58's dam include VBV ROA Akahime, who was the high-selling Akaushi heifer of the 2012 TWA Steaks are High sale, selling for $44,000. Additional full sibling and half sibling standouts include VBV ROA Akabana, VBV ROA Akabashi, IWG Ms Judo 82Z, ROA Kalanga Star of Maru, FAC Big Al, and BSF Prince Albert. This dam line pedigree is steeped in performance. JVS Big Al E58 ET is stacked with phenotypic excellence on both sides of the pedigree, and he displays this in person.

Semen is F.O.B.

		JAPANESE COW (RED)

Y2 Wagyu is proud to present WSI Hatsuhikari 184B, the direct son of original import bull Judo paired with Kaedemaru, herself a direct daughter of Dai 10 Mitsumaru by Dai San Namiaki Ni. The Kaedemaru cow line is responsible for name-stays of the Akaushi breed such as WSI Umemaru, LAG Mr Honjo Masamune, and WSI Kaememaru 2, herself the dam of two-time Grand Champion Akaushi bull SOR Mr Hiromitsu, two-time Reserve Grand Champion bull LAG "BOOMER" 1105D, SOR Hastings 1066, GK4 Rueshamaru, WSI Kaedemaru 2-1, and many more. WSI Kaedemaru further ties to Shigeharu and Ryumei, the sire of Rueshaw. WSI Hatsuhikari is steeped in rare and valued heritage, representing some of the greatest Akaushi genetics outside of Japan and quite possibly the best pedigreed Judo son available in the US.

Semen is F.O.B.

JC MS UMEMARU 30	WSI UMEMARU	HIKARI
		KAEDEMARU
	JVP KUNIASO J 6124F	JUDO 1223
		JVP KUNISAKAE 124

YYW Y2 Chisholm K301 ET is a direct son of Rueshaw 930, the only Japanese Grand Champion Akaushi to be exported. Rueshaw brings to the table phenotypic excellence while also upgrading meat quality. The dam of Y2 K301 is none other than JC Ms Umemaru 30, a direct daughter of WSI Umemaru by JVP Kuniaso 6124F, herself a direct daughter of Judo by JVP Kunisakae 124. Kunisakae was an original import dam combining the famed Dai 10 Mitsumaru and Dai 10 Shigekawa.

This exact breeding has produced Rueshaw II, who syndicated for $100,000 and has arguably more carcass data than any other next-generation US Akaushi bull, as well as JC Rueshaw 75, the 3-time open division IMF% Houston Grand Champion who recently sold for a World Record in Wagyu & Akaushi of $500,000 USD.

Further influential full brothers include the JC Rueshaw 92 and JC Rueshaw 90, as well as influential full sisters JC Ms Rueshaw 74 and JC Akasakae. This pairing has proven time and again its value in phenotype and on the hook. We believe that the consistency across the board of all of these aforementioned genetics only proves the value of JC Ms Umemaru 30 progeny as the premier cow alive in the US Akaushi breed.

Semen is F.O.B.

Y2 Wagyu is proud to present LAG "Boomer" 1105D, a direct son of original import Akaushi bull Shigemaru by Kaedemaru 2, herself a direct daughter of original import Akaushi bull Tamamaru by original import dam Kaedemaru. 1105D stacks the two most potent maternal bulls of the Akaushi breed, Shigemaru and Tamamaru, over the royal Kaedemaru line pairing Dai 10 Mitsumaru with Dai San Namiaki Ni, herself a combination of genetics by Dai 10 Eihou, Shigeharu, and Ryumei, the sire of Rueshaw.

LAG "BOOMER" 1105D is a phenotypically impressive bull whose utility as a growth and maternal bull is just beginning.

Translated as "The Creator", this moderately framed fullblood Akaushi bull is filled with front-line genetics. He was sired by Hikari, a son of Dai 10 Mitsumaru over Kazutomo, who was a combination of the famed Dai 2 Shigenami and Dai 10 Shigekawa lines. C221's second sire again ties to these two famous Akaushi lines through Shigemaru, who was a son of Dai 2 Shigenami over a Dai 10 Shigekawa daughter. The second dam of this bull is the famed Dai 8 Marunami, who was one of the original import dams of the breed to the U.S. This bull not only boasts superior Akaushi genetics, but is also free of all known genetic disorders.

Semen is F.O.B. and stored at Champion Genetics in Canton, TX

Here is one of the world's 1st homozygous polled purebred Akaushi!! This bull has it all, he is phenotypically impressive, has multiple generations of leading Heartbrand sires, is homozygous polled, and he possesses elite EPDs. His sire is Heartbrand King David 14E, the massively popular heterozygous polled bull with breed leading Weaning Weight and Yearling Weight EPDs (both top 2%). On the dam side we find leading bulls such as Heartbrand J-Prime, Shigemaru, and Big Al. Heartbrand Dos Equis XX is the ultimate package and is in the position to become the next super sire of the Akaushi breed as an asset to both the commercial F1 breeder and the purebred breeder. Do not miss the chance to get in on this sire at the beginning of what certainly will be a fantastic career!
