

INCREASE THE GENETIC VALUE OF YOUR WAGYU HERD

DON'T MISS YOUR CHANCE TO SECURE GENETICS FROM WORLD RENOWNED PIONEER WAGYU BREEDER

Established in 1991, Australian owned company, Sumo Wagyu entered the livestock industry with the goal of producing the most genetically elite Wagyu herd outside Japan.

In 1997 Sumo Wagyu imported 50 fullblood heifers and 6 fullblood bulls into Australia from Japanese Master Breeder Shogo Takeda. Soon after, Sumo Wagyu purchased the remainder of Takeda's Australian herd. With its acquisition, Sumo Wagyu now owned 90% of all fullblood Wagyu females in Australia. To this day, Sumo Wagyu continues to be a leading supplier of 100% fullblood Wagyu genetics.
